PROTECTS AGAINST IMPACT

ThermoPact MouthShield's unique triple-layer design and foam insert absorbs more impact energy than the leading over-the-counter, boil-and-bite athletic mouthguard, providing extra protection for the athlete's teeth and jaw.

MONITORS HEAT

The MouthShield's Thermo-Technology material changes color when an athlete's oral temperature reaches dangerous levels. This unique feature will enable coaches, trainers, parents and athletes to avoid heat-related injury or illness.
