

THERMOPACT MOUTHSHIELD

PROTECTS TEETH

Unique triple-layer design with D3O absorbs 20-60% more impact energy than leading over-the-counter boil-and-bite athletic mouthguards. Offers enhanced protection for teeth and jaws.

DETECTS HEAT

ThermoTechnology material changes color from black to red when an athlete's oral temperature reaches dangerous levels to warn against potential heat-related trauma - heat cramps, heat exhaustion and heat stroke.

EXPERTLY ENGINEERED

Developed by a dentist, medical equipment engineer and football coach with input from ballistics and heat labs for top-tier safety and effectiveness.

ATHLETE INSPIRED & FIELD TESTED

Designed in response to real life incidents and thoroughly tested to ensure it meets the rigorous demands of athletes, coaches, trainers and parents.

THE SCIENCE

Tested by Biokinetics: Ballistic Testing and Impact Sciences and the Korey Stringer Institute. Recommended and trusted by The Jordan McNair Foundation.

Ideal for high-impact and contact sports including football, field hockey, ice hockey, lacrosse, wrestling, boxing, kickboxing, martial arts, karate, taekwondo, grappling, mma, Brazilian jiu-jitsu, BJJ, combat sports, rugby, soccer, handball, water polo, basketball, acrobatics, skateboarding, baseball, softball, skiing, snowboarding, bicycling, skydiving, squash, gymnastics, surfing, inline skating, volleyball, racquetball, weight lifting, equestrian and track and field events.

Strap Included for Optional Use

Not Suitable for Individuals with Braces
